

My Story

How it began..

As a child I was always fascinated about computers. Being a 90s kid and from a middle class background I never had a chance to own a pc back then. I remember when I was promoted to 7th standard I was very excited.. not for the new full pants uniform but for being able to touch a computer for the first time.. that is when I decided to become a developer. A vendor cousin was already working as a web developer and I started learning from the same. School had already created a base in coding for me by teaching us netDOS and turtle [was fun at that time]. So here I am 10 years later living my dreams.
